How good?	National-title caliber; top-five baseline with unusually strong continuity
Preseason consensus	AP No. 4 (1,510 points; six first-place votes) · SP+ No. 3
Returning production	72% (No. 1) overall · Off. 67% (No. 18) · Def. 77% (No. 2)

Expected season	10.8 wins · most likely 11-1
Net vs. 2025	● ↔ Similar elite level, with different composition
Confidence	High

2026 identity: Notre Dame pairs returning QB CJ Carr and OC Mike Denbrock's explosive offense with a deep DC Chris Ash defense. The challenge is replacing two first-round RBs and several veteran front pieces without losing 2025's elite efficiency.

Bottom line: Notre Dame has the quarterback stability, returning core and schedule of a national-title contender. The downside is concentrated at RB, interior OL/front and unsettled specialist or availability spots.

Beats expectations if: RB Aneyas Williams keeps the run game explosive, the C/RG alignment settles quickly, and the front replaces DT Gabriel Rubio, EDGE Jordan Botelho, DT Donovan Hinish and DT Jared Dawson without losing disruption.

Disappoints if: The post-RB Jeremiyah Love/RB Jadarian Price backfield loses explosiveness, injuries thin the OL/front, and specialist turnover costs field position in the few close games.

Five things to remember

- 1 QB stability:** QB CJ Carr is the established returning QB1, removing the biggest preseason uncertainty that usually limits elite-team confidence.
- 2 National baseline:** Notre Dame is No. 3 in SP+, No. 4 in the AP poll, and No. 1 in returning production overall.
- 3 First-round RB losses:** Both 2025 lead backs, RB Jeremiyah Love and RB Jadarian Price, were first-round NFL draft departures.
- 4 ★ CB Leonard Moore:** CB Leonard Moore anchors a loaded secondary and carries the roster's strongest national-recognition profile.
- 5 ? Play-caller:** The exact 2026 primary offensive game-day play-caller remains unresolved.

2. 2025 in Context

Traditional Stats

Measure	2025	Assessment
Record	10-2 (0-0 Independent)	● Excellent
Scoring	42.0 PPG	● Elite
Total offense	458.5 YPG	● Elite
Rush offense	203.4 YPG · 5.7 YPC	● Very good
Pass efficiency	9.48 YPA · 25 TD / 6 INT	● Elite
Third downs	48.1%	● Elite
Scoring defense	17.6 PPG allowed	● Elite
Total defense	313.5 YPG allowed	● Very good
Rush defense	100.1 YPG · 3.0 YPC	● Elite
Pass defense	213.4 YPG · 6.20 YPA · 14 TD allowed	● Elite

Notre Dame's 10-2 profile was genuinely balanced: elite scoring, passing efficiency and third-down offense paired with elite scoring and run defense. There was no obvious conventional-stat weakness entering 2026.

Advanced Stats

Measure	2025	Assessment
Opp.-adjusted offense	+11.99 · No. 3	● Elite
Off. EPA/play	+0.272 · No. 3	● Elite
Off. success rate	47.6% · No. 22	● Very good
Off. explosive-play rate	17.8% · No. 2	● Elite
Havoc allowed	13.0% · No. 31	● Very good
Opp.-adjusted defense	+11.41 · No. 5	● Elite
Def. EPA/play allowed	-0.167 · No. 10	● Elite
Def. success rate allowed	35.6% · No. 12	● Elite
Def. explosive-play rate allowed	9.9% · No. 24	● Very good
Havoc created	18.7% · No. 13	● Elite

Advanced-stat read: Notre Dame was championship-caliber on both sides, pairing top-three offensive EPA with elite explosiveness and top-13 havoc creation. The 2026 risk is replacement and availability, not a fragile 2025 baseline.

EPA and success rate use CFB Graphs regular-season data. Explosive rate uses regular-season non-garbage-time cfbfastR plays; explosive = 10+ yd rush or 20+ yd pass. Havoc = TFL + forced fumbles + passes defended per play. Lower is better for defensive rates and offensive havoc allowed.

9. Betting Lens

Angle	Read
Market posture	Expect Notre Dame to be priced as an elite team; value depends more on whether markets misprice RB/front turnover than on finding them broadly underrated.
Back them when	Against opponents that cannot force obvious passing downs or stress the reconfigured interior OL, especially once the new RB rotation proves it can preserve early-down explosiveness.
Fade/pass when	At premium numbers against elite defensive fronts before the new backfield/interior OL proves itself, or if material camp-health questions persist.
Key monitor	RB workload/efficiency, C/RG alignment, Quincy Porter return timing, DT rotation/health, punter/return roles, offensive caller if clarified
Week 1 baseline	Notre Dame -22.5 vs. Wisconsin (neutral) · rating-only baseline; Notre Dame primer +26.5 minus Wisconsin primer +4.0; no home-field, matchup or availability adjustment. Compare with the live market before betting. Live market: Notre Dame -20.5 (CBS Sports, Aug. 25).

10. Summary

Notre Dame enters 2026 with top-five quality, the nation's No. 1 returning-production profile and an established QB in CJ Carr. The roster remains elite even after major NFL losses at RB and along the defensive front.

The title case is straightforward: preserve early-down explosiveness, settle the interior OL and specialist roles, and let a deep defense carry its usual efficiency. With a moderate schedule, 11-1 is the most likely outcome.
